

MAINTENANCE

WALNUT FURNITURE

All walnut furniture is first tinted with coloured oil and then finished with natural oil. This finish forms a natural coating, protecting it against most substances and fluids, but is no complete guarantee against stains.

For daily care

- For regular dusting, use a dry, non-fluffy cloth
- For cleaning, use a damp sponge or cloth (not too wet!) with a mild solution of water and natural soap (no detergent)

For cleaning & surface refreshing

- For refreshing the surface of the furniture when the wood starts to feel dry or for removing stains, Ethnicraft recommends Osmo Liquid Wax Cleaner (3029). Do not use this product daily. The Liquid Wax Cleaner is no guarantee against stains.
